Mini-Europe completes its tour of 27 cities

With its model of Ljubljana's Preseren Square now in place, Mini-Europe has completed its miniature European enlargement. The famous attraction park has always kept pace with the enlargement of the European Union by adding the newcomers progressively to its existing monuments. It all started back in 2003 when Mini-Europe inaugurated Spirit of Europe, its take on the common project symbolised by the European Union. Since 2004, Mini-Europe has tirelessly kept up with the successive phases of enlargement of the Union to finally add each of its 12 latest members. 2009 saw Brussels' Grand'Place fully renovated... with gold leaf, if you please!
